

Skandilock Curly 12 mm

Art. no 1111033-

Skandilock Curly 12mm is developed for furniture upholstery but can also be used for different furnishing assignments. The wool has a curly texture and is high in density which makes it durable and soft. The wool is cut to 12mm which reduces the density somewhat compared to Curly 17mm. This creates a somewhat sharper look and can give upholstered furniture a cleaner contour. The shorter wool also makes the sheepskin even easier to keep clean.

Curly 12mm comes in Classic Collection where the wool has been dyed with highlighted tips and darker base which gives the overall appearance a beautiful marbled finish.

Natural variations in color shade and wool character are likely to occur. When dyeing the skins, differences in fiber thickness and overall density means that the skin's ability to absorb dye varies within the same color batch.
